Abstract
Maison Neuve is a fictional site development plan for the Place Vendôme property at 5252 de Maisonneuve Ouest, located at the northwest boundary of the McGill University Health Centre (MUHC) Glen Campus site. This proposal proposes much needed affordable housing at this site, as well as community and not-for-profit office space, complementary research facilities and offices for MUHC. The proposed building, consistent with existing zoning for that location, would also serve as a visual buffer between the existing built form and the future MUHC campus. The conclusions and recommendations included in this report are intended to assist stakeholders in their discussion of desirable strategies for the successful integration of the Glen Yards hospital complex into the immediate neighbourhood and to the rest of Montreal.
